

Navigating the Rapids: Current State and Future Promise of Medicine in the Digital and AI Era

NAACOS Spring Meeting

April 23, 2026 | Baltimore, MD

Jennifer Goldsack
Chief Executive Officer
Digital Medicine Society
(DiMe)

OUR MISSION:

To advance the safe, effective, and equitable use of digital approaches to **redefine healthcare** and **improve lives**

OUR VISION:

Better health powered by digital innovation

DiMe convenes stakeholders to take action to fix the problems in our complex field

Healthcare 2030

Over the next five years, DiMe will prioritize:

Prevention

Move from sick care to true healthcare: early detection through predictive insights

Health Outcomes

Aligning incentives with better health, not box-checking, prioritizing real health impact

Personalization

Tailored care for every individual, not just the “average” patient

Sustainability

Deliver care that’s financially, professionally, and commercially viable

IMPACT AREAS

Leveraging these **technical drivers** of transformation:

Communication

Connectivity

Computing

Data

The Playbook

Implementing AI in Healthcare

KEY RESOURCES

Readiness Assessment

Interactive review of your organization's readiness to implement health AI

Maturity Model

Benchmark organizational adoption, integration, & change management

Implementation Framework

Four-step framework to guide the planning, deployment, monitoring, & scaling of your implementation

Title Sponsor

Google for Health

Project Partners

FREE COURSE SERIES

Implementation of fit-for-purpose AI solutions in low-resource health systems

COURSE 1 | Health AI essentials: A primer for aspiring AI champions

COURSE 2 | Health AI implementation: A practical roadmap for low-resource settings

Patrick J
McGovern
FOUNDATION

Ideal for:

- ✓ Clinicians
- ✓ Frontline staff
- ✓ Operations leaders
- ✓ Community health workers

The digital health space is evolving quickly – we are here to help you keep pace.

Scaling Trusted, High-Impact AI Care Navigation

**Healthcare navigation is
exhausting and costly.**

DiMe unites leaders to scale
trustworthy AI-guided care navigation
with built-in trust, equity, and ROI.

Virtual First
Care Coalition

Ensuring virtual-first care
is integrated,
discoverable, reimbursed,
and delivering across
payer networks

A symbol of quality & trust

Awarded to **digital health software products** that demonstrate performance against a comprehensive framework of standards and best practices in evidence, privacy & security, and usability.

CMS recognized the DiMe Seal as an evaluation pathway for digital health applications seeking inclusion in the forthcoming Medicare App Library.

68+ million Medicare beneficiaries now have access to a curated library of apps — and the DiMe Seal is how developers get in.

Healthcare 2030

Over the next five years, DiMe will prioritize:

Prevention

Move from sick care to true healthcare: early detection through predictive insights

Health Outcomes

Aligning incentives with better health, not box-checking, prioritizing real health impact

Personalization

Tailored care for every individual, not just the “average” patient
