WHY ARE WE MERGING?

Completing the Value Equation:
$$\text{Value} = \text{Quality} \div \text{Cost}$$

A Virtuous Cycle of High Value Care:

- FIRST AID
- MONEY MANAGEMENT
- EXAMINATIONS

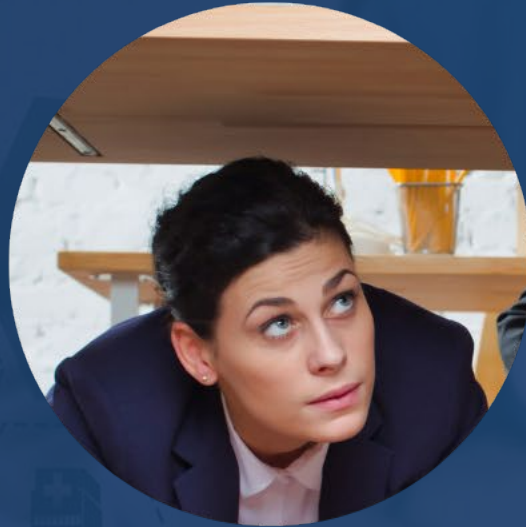

Today's Topic:

How Will You APP?

Your options for the APP:

Hope CMS changes
the rules

Hide under your
desk

Hard to implement
eQMs

MIPS
CQMs

You Are Hearing: APM Performance Pathway (APP)

=

~~eCQMs~~

Don't Believe It.

Think MIPS CQMs for your APP.

- FIRST AID
- MONEY MANAGEMENT
- EXAMINATIONS

After the Web Interface, there are three measures in the APP Quality Measure Set:

All Patients – All Payers

- #001 HgbA1c in Poor Control
- #134 Screen and Follow up for Depression
- #236 Control of High Blood Pressure

All three measures can be done with either:

e~~C~~QMs or
MIPS CQMs

~~eCQMs~~ =

- Over-Thinking
- Over-Spending
- Not Scalable or Sustainable
- The next new EHR/Organization breaks it

✓ APP with MIPS CQMs

The Challenges of eCQMs

According to NAACOS:

- Multiple EHRs is the norm
- Average of 36 TINs per ACO
- Max of 436 TINs in one ACO
- 40% of NAACOS members have >15 EHRs
- One ACO reports having 422 TINs using 65 EHRs

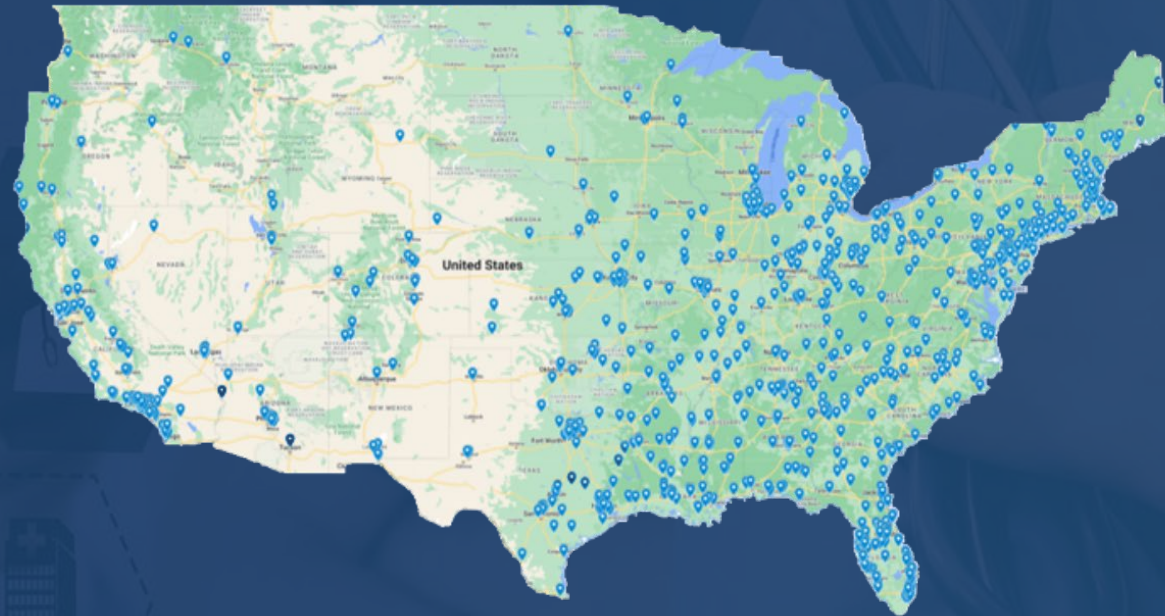

✓ APP with MIPS CQMs

Anything ~~eCQMs~~ can do,
MIPS CQMs can
do better.

The choice is clear:

	MIPS CQMs	eCQMs
Flexible	YES	NO
Adaptable	YES	NO
Multi-Source	YES	NO
Compatible with Any Workflow	YES	NO
170+ Measures	YES	NO
Fills Data Gaps	YES	NO

All States and Territories
